

Direct Thermal Linerless Labels

Saving time, money and the environment
by eliminating the label liner.

A Greener, More Efficient Label.

Linerless labels have a special silicone coating to prevent them from sticking together. They eliminate liner waste, disposal costs, and safety risks. They also have these benefits:

- Phenol-free construction is the future of thermal paper chemistry.
- Developed in collaboration with leading weighing scale and printer manufacturers.
- Minimal dusting and adhesive buildup prolong device maintenance cycles.
- Optimized direct thermal coatings for clear text and accurate barcode scanning.
- Comply with food safety regulations, including FDA regulation 21 CFR 175.105 for adhesives.
- Manufactured according to ISO 22000 food safety management standard.

Use 50% Fewer Raw Materials

Eliminate 50% of the
product that is usually
thrown away.

Enjoy 75% More Length Per Roll

Reduce labor costs,
due to rolls that are
75% longer.

Reduce Liner Waste by 100%

No liner means no
waste, eliminating
disposal costs and
hazards.

Why not check out our Co2 Calculator?

Our innovative calculator aims to demonstrate the significant reduction in CO2 emissions achievable by choosing linerless labels over the traditional self-adhesive labels.
